UNITED STATES**2011, September 20** (Save Vanishing Species)

B4 44c+11c Tiger

Panthera tigris

Felidae

A few comments are required regarding these identifications.

The **Australia Dingo** is a feral dog form and is listed as *Canis lupus*, (Grey Wolf), from which all domestic dogs are descended.

The **North Korea Goat** kid is probably a domestic form rather than a wild one, but I am unable to confirm.

The **Kyrgyzstan** animals set has no English or Latin names noted and the Deer species depicted appears to be a reasonable likeness of a White-tailed Deer, from America. There are instances of this species being introduced in several places in Europe, but I found no reference to one in Kyrgyzstan, which raises the question as to whether the wrong species has been depicted.

Finally, of the five new species on stamps noted, three are new Bat species. It is interesting to note that since the 1995 publication of ATA Handbook 128, *Bats in Philately*, which lists 58 species on stamps, the total some 16 years later according to my own listing is now 133.
